## Renewable Fuels Regulations

These regulations require fuel producers and importers to have an average renewable fuel content of at least 5% based on the volume of gasoline that they produce or import into Canada and of at least 2% based on the volume of diesel fuel and heating distillate oil that they produce or import into Canada. The regulations include provisions that govern the creation of compliance units, allow trading of these units among participants and also require recordkeeping and reporting to ensure compliance.

### Read about the regulations

- [Renewable Fuels Regulations \(http://laws-lois.justice.gc.ca/eng/regulations/SOR-2010-189/index.html\)](http://laws-lois.justice.gc.ca/eng/regulations/SOR-2010-189/index.html)
- The original regulations and later amendments can be found at the [Canadian Environmental Protection Act \(CEPA\) \(Canadian Environmental Protection Act, 1999\) Registry \(http://www.ec.gc.ca/lcpe-cepa/eng/regulations/detailReg.cfm?intReg=186\)](#)

### Compliance promotion information

#### Compliance unit account books

Environment and Climate Change Canada has developed gasoline and distillate compliance unit account book templates in Microsoft Excel format. Note that the compliance unit account books are not specified by the Minister for the purposes of subsection 31(5) of the regulations, and accordingly, their use is optional.
